

Dear Senator Schumer,
From Chuck Idol
Date 01/24/16
Subject: NY State PentaChloroPhenol Pole Study

Some time ago you asked for a study to be done on the Penta leaching impact of the PCP around utility poles.

Please find attached a very concerning report that was conducted specifically for New York State. The report although somewhat dated and its findings are consistent with newer reports and the chemical manufactures warnings, which are controlled by the EPA. I have attached the Manufactures detailed chemical warnings. I have also attached yet another PCP issue in Buffalo and I am working on another New York release case.

The EPA will not admit it but have a problem.

There are solutions and the EPA unwillingness to take even incremental action is going to get us all in the same state as Flint Michigan.

A great short film of one city now in Mississippi.

<http://www.wbrc.com/story/28944736/toxic-trouble-does-contamination-remain-in-the-soil-and-water>

There are solutions and there are short-term tactical alternatives to the dangerous activity the EPA is allowing to prevail without restrictions.

I CC'd several people on the EPA team who are still trying to make up their minds about reregistering this chemical and turning it lose on our citizens.

Did you know PentaChloroPhenol was known as "Agent Blue" in Vietnam? Agent Orange and Agent Blue served the same purpose and had the same devastating effects on our soldiers.

Thank you for what you have done to date to bring awareness to this issue.

Sincerely,
Chuck Idol
